HEALTH ADMINISTRATION

Overview of the Health Administration program:

Health administration is one of the fastest growing areas of management. The Health Administration program educates and prepares individuals to be leaders who can meet the challenges of health care in our region, advance the quality of care delivered to all, and meet anticipated workforce needs in a variety of positions in health administration.

The Bachelor of Science in Health Administration (BSHA) degree at MSU Billings is designed to prepare you to work in the rapidly growing field of Health Administration.

- Be part of a degree program that is guided by the region's top healthcare leaders to meet national certification standards
- Work with and learn from some of the region's most successful health care executives who serve as instructors, guest lecturers and mentors
- Access to local, regional and national internship opportunities plus on-the-job experience before you graduate
- Develop competencies in General management, Health Industry and Health Policy, Health Leadership, Communication, and Critical Thinking

The Master of Health Administration (MHA) degree program is designed to provide the knowledge and skills required for leaders in health services management and administration.

- With a focus on rural-frontier healthcare delivery, the MHA is appropriate for working professionals, clinicians, mid-level managers, and others who desire to enter and advance in this growing field.

What makes your program unique?

Our programs are unique because they are 100% online.

What students like most about the Health Administration program:

Our students appreciate our programs because they can be completed while working full-time and balancing work, life and school.
