

Mountain State Poll

October 2026

39th edition

Dr. Hope Dewell Gentry, Director

Introduction and Acknowledgements

This year, we conducted the 39th version of the Mountain States Poll. Originally called the Eastern Montana College Poll, Dr. Craig Wilson started this project in 1989. We collected a total of 720 responses, making a margin of error of 3.65% Phone responses were gathered using random digit dialing techniques from phone numbers provided by Scientific Telephone Samples. The total number of valid phone responses is 129. Online responses were collected using quota sampling via Centiment. The total number of valid online responses is 591. Responses were recorded from October 5-21, 2026. Subgroups will have a larger margin of error. Responses are weighted according to Montana census data. Funding was provided by the Office of the Provost, the College of Liberal Arts and Social Sciences, and the Department of Social Sciences and Cultural Studies at Montana State University Billings.

As of this year, we will use the name Mountain State Poll, rather than Mountain States Poll, to more accurately reflect that the responses only come from one state: Montana.

As always, I would like to thank Dr. Jessie Perius in the College of Business for teaching me what I needed to know to run this Poll. I would also like to thank my department, my Department Chair, Dr. Paul Pope, and our Program Coordinator, Glenda Holbrook. Additionally, I am grateful to Dr. Jay Gentry for allowing his class to volunteer for the poll. Nice job to Malinda Christensen, Kyle Jones, Audrey Mills, Addison Sylvester-Novasio, Kyra Thompson, and Megan Zickuhr!

Most of all, I would like to thank the PSCI 342 Media, Public Opinion, and Polling class of 2026. We couldn't do this project without them, as they are the ones who write the Poll and conduct the phone interviews. Amazing job, class! Well done!
