

Stay fit and Slim

Every woman wants to look better, to feel better in the year ahead. Slenderness is the way to health, beauty and fitness. A couple of grammes of amphetamine sulphate taken daily enables you to 'slim while you do the housework' - surely and safely.

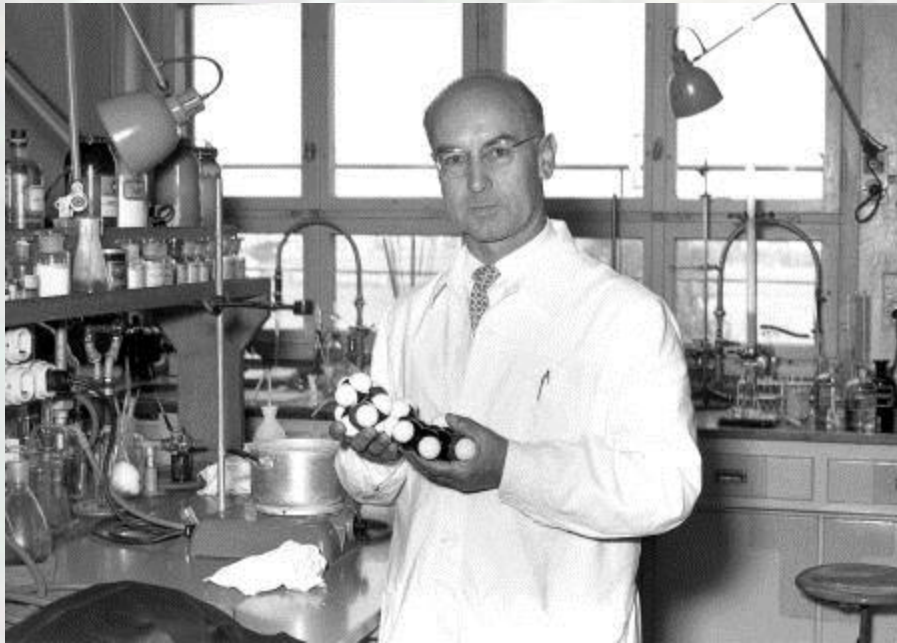

This magic powder does more than disperse unwanted fat it purifies and enriches the blood, it tones up the entire system and makes you feel better in health in every way. It even gives you the energy to carry on working throughout the night.

So start taking amphetamines today and make sure of looking and feeling your best in 1940.

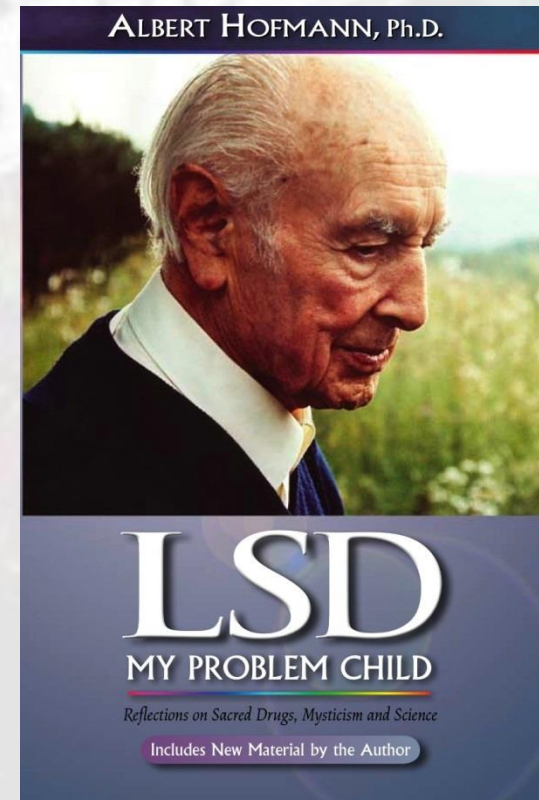

By taking
Amphetamine

- Albert Hofmann
- First LSD synthesis
- Nov 16, 1938
- Sandoz

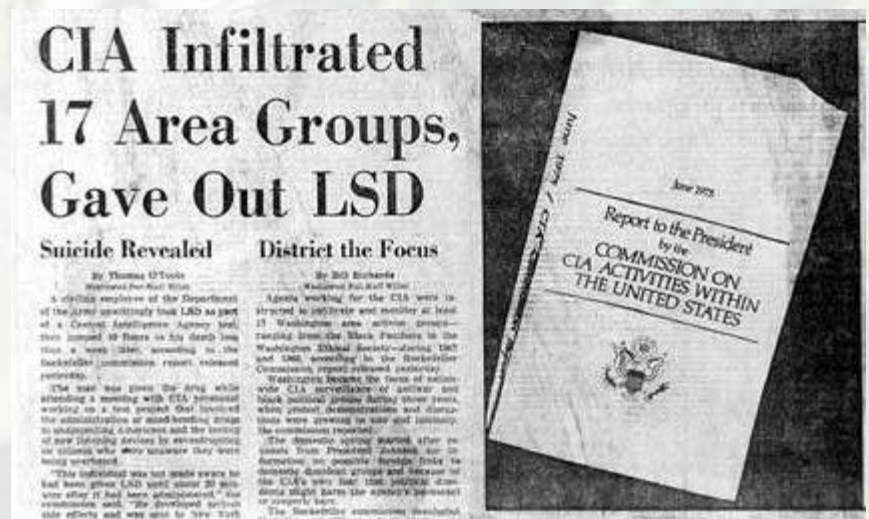

Over the next decade
LSD was investigated as:
-a psychotherapy
-a truth serum
-mind control

MKUltra – 1953 CIA program to
investigate LSD
-150 “projects”
-all records destroy in 1973
-Ken Kesey claims to have been
a “volunteer”

The Merry Pranksters

1965 Drug Abuse Control Amendments

- Control over manufacturing and distribution of “dangerous drugs”**
- “Dangerous” meant barbiturates, amphetamines , hallucinogens but it didn’t name the drugs so enforcement was difficult**
- Defined “narcotics” as heroin, morphine and marijuana**

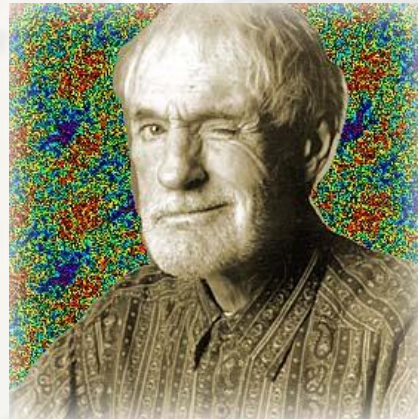

Timothy Leary

- seminary experiment 60-62
- Concord prison experiment 61-63
- Harvard fired him over marijuana use

**LSD IS A
DRUG THAT
CAUSES
INSANITY
IN PEOPLE
WHO HAVE
NOT TAKEN
IT.**

Congressional Hearing - 1966

Kennedy: You said you do not know about the quality. What is it about the quality that you are frightened about?

Leary: We do not want amateur or black-market sale or distribution of LSD.

Kennedy: Why not?

Leary: Or the barbiturates or liquor. When you buy a bottle of liquor –

Kennedy: This is not responsive. As to LSD, why do you not want it?

Leary: On possession?

Kennedy: Why do you not want the indiscriminate manufacture and distribution? Why not? Is it because it is dangerous?

Leary: Because you do not know what you are getting.

Kennedy: Is it because it is dangerous? Are you interested only in the consumer and whether, like truth in packaging, whether there are too many strawberries or not enough strawberries in the pie, or is it something more dangerous than that, Dr. Leary?

Leary: No sir: I think LSD is much less dangerous than the amphetamines and barbiturates.

Kennedy: I am not asking that. The reason, as I would gather it, is this is a dangerous drug: is that right?

Leary: No sir: LSD is not a dangerous drug.

Harry J. Anslinger

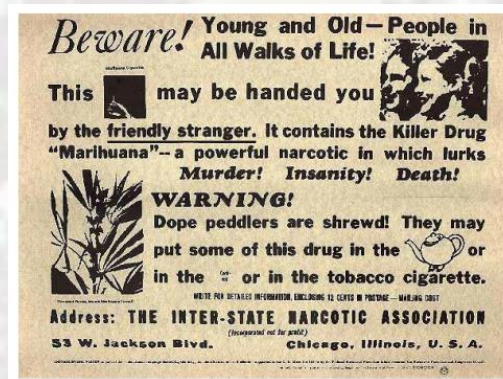

-First commissioner of the Federal Bureau of Narcotics – 1932-1962

-Marijuana Tax Act - 1937

-1937-1970 Marijuana was classified as a narcotic and fell under the same restrictions

MDMA (Ecstasy)

1970 Comprehensive Drug Abuse Prevention & Control Act

1) Treatment – provided funds for drug abuse treatment & rehabilitation (in fact every community mental health center and public health center got a drug rehabilitation officer).

2) HEW was given the task of setting up treatment guidelines and education programs

- many of you were probably exposed to these public awareness programs in school

NIDA - was the scientific and education organization

DEA – Legal arm

FDA – continue to regulate pharmaceutical industry

3) Commission on marijuana and drug abuse – the act paid more attention to marijuana than other drugs.

---One of the stated reasons for the commission was to reduce marijuana use but in 1973 after studying the problem the commission recommended decriminalization of “possession-for-use”. So that did not go over very well at the time.

4) Established penalties for simple possession vs. distribution

5) Established 5 drug schedules and the penalties associated with each drug.

Drug Schedules

DEA Schedule	Abuse Potential	Examples of Drugs Covered	Some of the Effects	Medical Use
I	Highest	heroin, LSD, hashish, marijuana, methaqualone, designer drugs	Unpredictable effects, severe psychological or physical dependence, or death	No accepted use; some are legal for limited research use only
II	High	morphine, PCP, codeine, cocaine, methadone, Demerol, benzedrine, dexedrine	May lead to severe psychological or physical dependence	Accepted use with restrictions
III	Medium	codeine with aspirin or Tylenol, some amphetamines, anabolic steroids	May lead to moderate or low physical dependence or high psychological dependence	Accepted use
IV	Low	Darvon, Talwin, phenobarbital, Equanil, Miltown, Librium, diazepam	May lead to limited physical or psychological dependence	Accepted use
V	Lowest	Over-the-counter or prescription compounds with codeine, Lomotil, Robitussin A-C	May lead to limited physical or psychological dependence	Accepted use

Summary of the 1970 Law

-It's not perfect

-Drugs ranked by medical value not some moral or ethical scheme

-Treatment and education played a major part

-Set penalties that were consistent with perceived abuse potential

From one of the Presidential Candidates a few weeks ago:

"Plain and simple, drug and alcohol addiction is a disease, not a moral failing — and we must treat it as such,"

"It's time we recognize that there are gaps in our health-care system that allow too many to go without care — and invest in treatment. It's time we recognize that our state and federal prisons, where 65 percent of inmates meet medical criteria for substance use disorders, are no substitute for proper treatment — and reform our criminal justice system."

“The PC is the LSD of the '90s.”

— Timothy Leary
