

# Applied Behavior Analysis Licensure Disclosures

MSUBillings' Applied Behavior program completion meets the educational component eligibility requirement to apply for BCBA certification. However, BCBA has requirements beyond degree completion that must be met before licensure can be applied for or attained.

In all 50 states, there are additional requirements to fulfill before licensure can be attained. These include, but are not limited to: certification from the Behavior Analyst Certification Board and clinical hours. Please see [state specific regulatory information](#).
